A Phase II Study Evaluating the Role of Sentinel Lymph Node Surgery and Axillary Lymph Node Dissection Following Preoperative Chemotherapy in Women with Node Positive Breast Cancer (T1-4, N1-2, M0) at Initial Diagnosis

Checklist for Submission of Quality Assurance Materials
Version Date: 12/16/2013

Patient Initials:__________ Protocol: Z1071 ACOSOG Patient#_________________

Send materials to: Quality Assurance Review Center
Attention: ACOSOG Materials
640 George Washington Highway, Building A, Suite 201
Lincoln, RI  02865

Within 1 month after surgical resection, the following is due for submission (see Section 5.2.1):

Pre-Chemo:

___________ Ultrasound images of the axilla (if available) and report.
- If the pre-chemo US cannot be submitted, please submit a written note to file documenting the reason to QARC.

Post-Chemo/Pre-surgery:

___________ Ultrasound images of the axilla & report

Diagnostic imaging scans must be in digital format. DICOM format is preferred but if this is not possible then high quality scanned images or screen captures are acceptable. The files may be burned to a CD and mailed to QARC. Multiple studies for the same patient may be submitted on one CD; however, submit only one patient per CD.

Note: If protocol therapy is discontinued early prior to surgery and the patient does not undergo a pre-operative therapy axillary ultrasound, QARC must be notified of the reason(s) and the date the patient stopped therapy. The notification must be submitted in writing via email to acosog@qarc.org or Fax (401) 753-7601.

For clarification please contact the ACOSOG Protocol Contact at ACOSOG@QARC.org or 401-753-7600.
